Safety

IMPORTANT SAFETY INSTRUCTIONS

1. To disconnect the machine from the electrical power supply, turn off the power switch and remove the power cord plug from the wall socket. The wall socket must be easily accessible and in close proximity to the machine.
2. Read these instructions carefully. Save these instructions for future reference.
3. Follow all warnings and instructions marked on the product.
4. Do not use this product near water.
5. Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.
6. Slots and openings in the cabinet and the back or bottom are provided for ventilation; to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heat register, or in a built-in installation unless proper ventilation is provided.
7. This product should be operated from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
8. Do not allow anything to rest on the power cord. Do not locate this product where persons will walk on the cord.
9. Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

FCC

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference
- (2) This device must accept any interference received, including interference that may cause undesired operation.

CE Mark

This device complies with the requirements of the EEC directive 89/336/EEC with regard to "Electromagnetic compatibility" and 73/23/EEC "Low Voltage Directive".

LEGISLATION AND WEEE SYMBOL

2002/96/EC Waste Electrical and Electronic Equipment Directive on the treatment, collection, recycling and disposal of electric and electronic devices and their components.

The crossed dustbin symbol on the device means that it should not be disposed of with other household wastes at the end of its working life. Instead, the device should be taken to the waste collection centers for activation of the treatment, collection, recycling and disposal procedure.

To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract.

This product should not be mixed with other commercial wastes for disposal.

2. Features

1. Data can be display on 20 columns x 2 lines.
2. Blue–green color and large character are easy to see.
3. The DIP switches setting emulate commands mode, baud rate and international character.
4. Command emulation modes include: POS7300, EPSON ESC/POS, ADM787/ ADM788, DSP800, AEDEX/ EMAX, UTC, and CD5220.
5. Display area can be controlled by window function.
6. Provides an interface based in RS-232C, and RS232C baud rate from 4800 to 38400 bps.
7. Reverse characters can be specified using the Epson command set.

3. Specification

6. Software Status Setting Commands

When the system is POWER ON, it will read the DIP switch to set the **Command Type, Baud Rate, Parity, Demo Mode and International Character**. User can re-set the Software Status Setting Commands as following:

6.1. Baud Rate Setting Command

STX 05 B n ETX /Change the baud rate setting/
 ASCII Format STX 05 B n ETX
 Dec. Format [02] [05] [66] n [03]
 Hex. Format [02h][05h][42h] n $30h \leq n \leq 33h$
 [0 3 h]
 Description Change the display communication baud rate. The baud rate setting can be selected from 4800 to 38400.

n	Baud rate
30h	4800
31h	9600
32h	19200
33h	38400

6.2. Parity Check Setting Command

STX 05 P n ETX /Change the Parity check setting/
 ASCII Format STX 05 P n ETX
 Dec. Format [02] [05] [80] n [03]
 Hex. Format [02h][05h][50h] n [03h] $n=30h, 31h$
 Description Change the display communication parity. Set 8 data bit and the parity set for even or non-parity.

n	Parity check
30h	None-parity
31h	Even-parity

6.3. International Character Set Setting Command

STX 05 S n ETX /Change the international character set/
 ASCII Format STX 05 S n ETX
 Dec. Format [02] [05] [83] n [03]
 Hex. Format [02h][05h][53h] n $30h \leq n \leq 4Fh$
 [0 3 h]
 Description Change the display international character font.

n	Character Set (20h – 7Fh)	Code Table (80H-FFH)	Note
30h	U.S.A.	CP-437 (USA, Standard Europe)	
31h	FRANCE	CP-858 (Multilingual + Euro Symbol)

6.4. Command Type Setting Command

STX 05 C n ETX /Change the command type setting/
 ASCII Format STX 05 C n ETX
 Dec. Format [02] [05] [67] n [03]
 Hex. Format [02h][05h][43h] n 30h ≤ n ≤ 37h
 [0 3 h]
 Description This command will change the command type and initialize the display.
 The display emulation mode is based on DSP800/ ESC/ ADM 787/ POS7300/ AEDEX/ UTC/ CD5220 mode.

n	Command Type	n	Command Type
30h	POS7300	34h	AEDEX
31h	ESC/POS	35h	UTC/P
32h	ADM 787	36h	UTC/S
33h	DSP800	37h	CD5220

6.5. Run Demo message

STX 05 D 08 ETX /Run demo message/
 ASCII Format STX 05 D 08 ETX
 Dec. Format [02][05][68][08][03]
 Hex. Format [02h][05h][44h][08h][03h]
 Description Run demo message for the display.
 The display emulation mode is based on DSP800, EPSON ESC/POS, CD5220 command type.

6.6. Show Firmware Version

STX 05 V 01 ETX /Show Firmware Version/
 ASCII Format STX 05 V 01 ETX
 Dec. Format [02][05][86][01][03]
 Hex. Format [02h][05h][56h][01h][03h]
 Description Show firmware version.

Pole Display Module

Flat Cable (DB-9P to DB-9P flat cable connector)

Base Unit

Two pieces of pole support (1x22cm, 1x9cm)

Installation guide

Power Adapter

2. Features

1. Data can be display on 12 columns x 1 line.
2. Blue–green color and large character are easy to see.
3. Command emulation modes include: POS7300, EPSON ESC/POS.
4. Provides an interface based in RS-232C, and RS232C baud rate 9600 bps.

3. Specification

NO	Item	Description
1	Display method	Vacuum fluorescent display
2	Number of character	40 characters (12 columns x 1 lines)
3	Character font	7 segment
4	Display color	Blue green
5	Brightness	700 cd /m ²
6	Character type	10 numeric
7	Character size	dot matrix 17.0 x 5.4 mm
8	Power supply	11-19VDC Manufacture offer +12V power adapter
9	Power consumption	3 - 6 W
10	MTBF	25000 hours (power on time)
11	Panel dimensions	224 (W) x 93 (H) x 50(D) mm
12	Support dimensions	Long support : 22 cm Short support : 9 cm
13	Base dimensions	19.7 x 10 cm (W x D)
14	Viewing angle	-5 - 60 degrees
15	Rotation angle	Maximum 270 degrees
16	Weight	1.25 Kg
17	Operating temperature	5 - 45 °C
18	Operating Humidity	30%-85%
19	Storage Temperature	-10 – 55°C
20	Storage Humidity	10%-85%

Appendix A - Command Details

A.1. Overwrite mode

In this mode, the cursor will move towards the right and begin from the upper left position. When the cursor has reached the end of the upper line, the cursor will move down to the bottom left position to continue. When the cursor has reached the end of the bottom line, it will move to up the upper left position and overwrite the previous characters.

A.2. Vertical scroll mode

In this mode, the cursor will move towards the right. The cursor will begin from the upper left position until it has reached the end of the upper line. The cursor will then move down to the bottom left position to continue until it has reached the end of the bottom line.

A.3. Horizontal scroll mode

In this mode, the extent of the cursor activity is bound by a predefined range, limited to the upper line. (Please refer to Set or cancel window command), where the default window is the whole upper line. The cursor will begin from the left-end of the range and move rightward until it reached the end of the range, to continue, the characters that comes thereafter will start pushing the previous characters leftward from the right-end, scrolling the characters to the left.

A.4. Set the string display mode and write string to display

Set the string display mode, write to upper or lower line $d1\ d2\ d3\ \dots\ dn$ $\{1 \leq n \leq 20\}$. 'A' stands for the upper line, 'B' stands for the lower line. The string display mode will be cancelled and the display will return to the previous mode after receiving CLR or CAN.

A.5. Upper line message continuous scroll

The message (previously defined) will scroll continuously in the horizontal direction until a new command is received.

A.6. Move cursor left

When the current cursor is at the left-end position, this command operates differently depending on the display mode.

- **Overwrite mode:** When the cursor reached the left-end of the lower line, it will continue to the right-end of the upper line, overwrite previous characters. When it reached the left end of the upper line, it will continue to the right-end of the lower line.
- **Vertical scroll mode:** When the cursor reached the left-end of the lower line, the lower line will scroll up and replace the previous upper line, the lower line will be cleared and the cursor will continue to the right end of the lower line.
- **Horizontal scroll mode:** The cursor will remain stationary.

A.7. Move cursor right

Move the cursor to the right. When the cursor has reached the right-end, this command operates differently depending on the display mode.

- **Overwrite mode:** When the cursor has reached the right-end of the lower line, it will continue to the left-end of the upper line and overwrite previous characters. When it has reached the right-end of the upper line, it will continue to the right-end of the lower line.
- **Vertical scroll mode:** When the cursor has reached the right-end of the lower line, the lower line will scroll up to replace the upper line, the lower line is cleared and ready to continue characters thereafter.
- **Horizontal scroll mode:** The cursor will remain stationary.

A.8. Move cursor up

Move the cursor up one line. When the cursor is on the upper line, this command operates differently depending on the display mode.

- **Overwrite mode:** The cursor is moved to the same column the lower line.
- **Vertical scroll mode:** The characters displayed on the upper line is scrolled to the lower line, and the upper line is cleared. The cursor will remain at the same position.
- **Horizontal scroll mode:** The cursor will remain stationary.

A.9. Move cursor down

Move the cursor down one line. When the cursor is on the lower line, this command operates differently depending on the display mode.

- **Overwrite mode:** The cursor is moved to the same column on the upper line.
- **Vertical scroll mode:** The characters displayed on the lower line are scrolled to the upper line, and the lower line is cleared. The cursor will remain at the same position.
- **Horizontal scroll mode:** The cursor will remain stationary.

A.10. Move cursor to home position

The cursor will move to the left-end position of the upper line.

A.11. Move cursor to left-most position

The cursor will be moved to the left-end position of the current line.

A.12. Move cursor to right-most position

The cursor will be moved to the right-end position of the current line.

A.13. Move cursor to bottom position

The cursor will be moved to the right-end position on the lower line.

A.14. Move cursor to specified position

The cursor will be moved to column x on line y.

A.15. Initialize display

The data in the input buffer will be cleared and reset from default.

A.16. Reset the window

Reset the window on the display.

When s=0, the window is cancelled (values: x1, x2, and y are not required.)

When s=1, the window will be reset (values: x1, x2, and y are required.)

The x1 and x2 set the position of the left column and right column, respectively, of the window.

The y sets the upper line or the lower line of the window.

This function is valid within the horizontal mode.

A.17. Clear display screen and clear string mode

All the display characters will be cleared, and the string mode will be cancelled.

A.18. Clear current line and cancel string mode

The current line is cleared, and the string mode is cancelled.

A.19. Brightness adjustment

Adjust the brightness of the vacuum fluorescent display.

When n=3, brightness=70%

When n=4, brightness=100%

A.20. Set cursor ON or OFF

When n=0, cursor is OFF

When n=1, cursor is ON
